| <p>3:30PM–5PM</p> <p>(90 minutes)</p> | <p><i>New Growth: 2 concurrent breakout discussions led by Grazings speakers on each topic of the day.</i></p> |

Structure:

Grazings - 10-minute overview of ideas and challenges related to the subject of the panel designed to initiate thought among panelists and inform the uninitiated in the audience so that they may participate in the conversation.

Ruminations - Discussion among the participants about the challenges and solutions related to the subject of the panel. A moderator will manage the conversation, and direct questions to participants that accentuate her/his expertise and explores differences of opinion.

New Growth - Each day will wrap up with three breakout sessions conforming to the three topics explored. Audience and participants will engage in discussion about solutions to the problems raised within the preceding panels. Emphasis will be placed on encouraging feedback and ideas from audience members. Sessions will be moderated by members of Food Solutions New England, our co-sponsor. Dartmouth students will document the conversations in real time via social media -- twitter and/or instagram - and notes will be taken for inclusion on the wordpress site. www.cowslanlabor.com

Pre-conference: Short videos will be filmed with various participants about their topic and uploaded to the conference website prior to the conference. We will also supply open access to publications related to the conference.

Facilitating audience participation: In addition to “new growth” sessions, Dartmouth students will be assigned to manage **twitter** and **instagram** comments and questions throughout the conference. During panel discussions, after 45 minutes, the moderator will turn to the student managing social media and pull in questions from the audience, in addition to receiving questions and comments from the auditorium. We will use the **#dartcows19** to receive comments and questions via social media.
